More Than Eleven Hundred People Trampled to Death by the

Multitudes.

Moscow, May 30.—A terrible panie resulting from the great crush of people at the popular least held here today in of the coronation of the Ozar caused the trampling to death of man-

On the plain long lines of rough tables, flanked by rougher benches, bad been erected. It was arranged to accommodate 500,000 people. To feed the multitude an army of cooks and waiters was gathered together, the srmy bake houses were taxed to their utmost and 500,000 mugs, each bearing portraits of the Carand Carains, were ordered for presentation to the people taking part in the banquet. Thousands of head of cattle, train loads of provisions and shiploads of liquid refreshments were sent to the plain, and this morning all was in readiness for the tables was really enormous, and all were desperately hungry, some having fasted nearly twenty-four hours. The police did everything possible to keep back the crowd, but suddenly the masses pressed forward, swept everything before them, overturned tables and benches, trampling hundreds under foat and crushing the ille out of a grest

1000 persons were killed in the terrible disaster.

Among the deal found on Kohdinsko Khodinkinsje plain werelsedse evidently of high rank, dreased in the finest silk and bedeckted with the richest jewels. The police harracks, to which the bodies of the dead were taken by the authorities, are besieged with people clamoring for news of friends and relatives. The consea at the barracks are terrible in the extreme. The ramains of the dead will be conveyed to the converty, where a large morgue is to be located. The disaster, as now explained, was due mainly to the absence of the police who had had not arrived at so early an hour. Fully 200,000 nersons of all grades of society had gathered together on the plain at the time the disaster occurred. Only about 1000 attendants were in charge and they seemed to be unable to control the mobility of the second of the of the sec

For a time the officials in charge of the banquet lost their heads entirely. The crowds seemed to have gone mad with rage and excitement, shoutting, cursing and yelling as they passed on-ward over a path strown with dead and dying human beings. Eventually, however, seeme show of order was restored by the troops which were heatily summoned, and then began the work of extreating the dead and injured, ranging them on the ground in groups of tentucenty and thirty at every bundred yards or so, and the disputching to the city as a speedily as possible in military

countles party lines have almost been case in this (Mulinomal) county. There are two Republican tickets in the field, a Democratic and a Populiat ticket and any number of independent candidates. It is conceled that R. S. Bean, Republican candidate for auprene judge, will be elected by a large majority, probably in excess of 10,000.

The legislature will probably be Republican by a good cized majority, as the Republicans have ten hold-over senators out of thirty. In the last house the Democrats were not represented, while the Populite had only six out of sixty, the remaining fity-four being Republicans. In the second congressional district there are three free silver candidates and one gold standard candidate in the field and the contest will be close.

In the first congressional district Thomas H. Thongue, Republican, will probably win.

The greatest interest in this city is centered in the mayoralty. At the present time it appears that ox Governor Pennoyer is in the lead for this place.

Tur esteemed Populist contemporary concludes an article of a column and a half in length, intended to prove that its party is the only one that is national in its character and fixed in its princi-ples, by giving the whole thing away.

Populate do not claim that bimetal-Populists do not claim that bimetal-lism is anything more than a paliative; they demand its restoration as an act of justice, and as only one of the steps necessary to restore the paralyzed pros-perity of the nation. They make no "feitht" of either gold or silver, and would prefer, if one is to be demone-tized, that both should be, and thus forever exterminate the whole brood of leeches and gamblers that fatten on the toil and agony of the race.

That is the idea, exactly. The Popu-lists declare for bimetallism in their

platform, and yet they "do not claim, that it is anything more than a palistive." and believe that "the whole brood the toil of the race" can be forever ex-terminated by demonetizing both gold and eilver. One of the most remarkable facts in ection with the history of scientific invention is found in the frequent discoveries of extremely simple and yet valuable facts in connection with me-chanism that has been in world-wide use for ages. A well-authenticated claim is now made by Captain Vassalo, an Italian mariner, that the speed of an interest and the peed of sailing vessels may be very materially increased by perforating the sails. He supposes that the fixed cushion of air filling up the hollow of an inflated sail leasens the effect of the wind, and he has sought to prevent the collecting of this cushion by making a number of holes in the canvas. Several trials made in all weathers have given surprising results. In a light wind a vesprants returned. In a light with a ver-sel made four knote with ordinary sails, and five knote with perforated sails; in a fresh breeze, seven and eight and threefourths knots respectively; and in a strong wind, eight and ten knote. The ship's value would be incressed one-fifth -its trip of five weeks being reduced to four weeks-if the increased speed can be sustained throughout a long voyage

The trampling to death of hundreds of men, women and children at the cor-onation lesst of the Czar was a rather unpleasant incident, but it did not serve to weaken the appetites of the survivors more seriously delay the work of feeding them. The kind of people who fight like wild beasts for a place at the feetal board evidently require a restraining hand that is pretty powerful at all times. There are some reasons for the seide from the fact that the nibiliete

The Swimming Baths.

The Swimming Baths.

The swimming baths, located on the corner of Maripusa and N streets formerly owned and conducted by Mr. Geo. F. Church, were restructary said by him and by the purchasers placed under the efficient namagement of Mr. L. Popovich. Mr. Popovich is a gentleman with experience in this line of work, being known throughout the state as one of the best of swimmers. The new management contemplates many radical changes and improvements tonding to increase the popularity of these baths, and it will be safe to predict success in its venture. While these improvements are being bastened to completion, the baths will be kept open every day and evening, and as soon as linished the public will be treated to a grand opening.

Mighty Hard Scratching for Something to Say.

WHEN INKSTANDS WHISTLE BY

The World, its End and Its Enders—The Strike of the Chain Gang-Nubbins.

It is a hard time for local news and a harder time to find subjects in our lim-ited field that are worthy of comment. ably, was surprised, but someway I ably, was surprised, but someway i cannot work up much eathersam on that subject. The attendance at church was about the same as usual, but you sincered not eare about that. What chall one write about?

It has been some time since first I asked myself that question today, and still the answer seems to evade me. The summer sunshine glints through

still the answer seems to evade me. The summer sunshine glints through the trees across the way, and yet I sit and think. While I think the buss of the flies goes unceasingly on. It is a curious fact that the flies never seem to lack for something to say. I wish I were a fi- no, I casnot wish that, but it must be nice never to lack for a subject of discussion.

Just at this moment a party of the carefree little creatures have started a dance on the bald spot on my head. I cannot see them, but I can fee that it is to. Eight of them have chosen partners for a plain quadrille. Now they have joined hands and are circling to the left. The orchestra is exacted in the edge of the underlyculo on my bump of self-esteem. It is a high and commanding place. Shall I interrupt the little plessure scelens in their innocembratime? I will not, but after they have gone I will have my bald spot ellelacked and will erect a "fresh paint" sign there. This will be a joke on the little flies who shawe have something to say. It will serve them right. Why should they not be puzzled for a subject to discuss, too?

In this dearth of topics I am not us mindful of the fact that vesterday was Memorial Day. But what do we can about that day of sad memories? No

Memorial Day. But what do we care about that day of sad memories? Not very much, Judge. In many California towns it will be a day for picunics and an extra allowance of beer. In other towns it will be well night forgotten. I think now of one little eastern town where the day will be held secred. From many a mile around the people will gather and lay their bright flowers on the graves of those, their "heroes dead" who have slopt so long. It is an day of picnics and jollification with them. They still tenderly remember the onea who blyouch beyond the river.

I am glad that Freen is not making this a day of jugons pow-wow. Had it done so—an California towns so often do—I would not have lacked a subject on which to write, for I will lose no chance to protest against a thing so out of all becoming taste, but it is much better to be same a subject. A third of a century has passed since the men who wore the blue or the gray went out to battle for causes that they believed to be right. Time has well-nigh heated the old wound. It is a splendid thing to have lots of money and he able to advance it to people who need it in their business. I congratulate Mr. Waleer in advance, and sek to be given a preference.

Two years is not a very long time, and I have a great deal of business to which I really ought to attend. I do not believe that my garden will be in any sort of shape before 1893 at the earliest.

But this brood of alarmists ammes me. Ensa God nove in any less mysterious way. Who are you, that you thould read the plane of the One who holds the universe in His hands? How can you fall to know that the wienst of men is but a blind guesser in

Ah, well! It is useless to discuss the matter with you. You are what you are, and you will w'en go your way, talking wildly to whoever will listen to you. But suppose that you were right; suppose that the end of the world were at hand, what then?

There have been surprise parties, whiteat rabed. strike. Almost anybody would. I do not believe that any man living ongoit to do physical work on two mesle a day. Laws to the contrary are in contravention of that higher law of physical nature which finally will prevail. Men who are in jail for vagrancy should be compelled to labor, for they are supposed to be under arrest solely because they will not toil. But while they work they should be sufficiently fed, for no petry human law can rightfully stand in the way of the very law of our being. If they will not work, then give them two masle a day, or less, if need be. But feed working men as workingmen should be fed.

PAINTED BEAUTIES.

Several Fresno Rigs That Would Attract Attention Anywhere.

There has just been turned out of the palnt shop a number of vehicles that will attract admiring attention wherever they may be seen. There is a gloss and finish, an artiste blending of colors and a general excellence about the work on all these vires that indicate unmiestably that they were all painted by the master hand at J. B. Harrington. The old Sileity angline at No. 2's engine house looks like a new machine. But it is on the delivery wagons of John C. Moures, Kutner-Goldstein Company and Welle-Fargo Company that Mr. Harrington shows his peculiar still and the high class of his workmanship. J. B. Harrington shows his peculiar still and the high class of his workmanship. J. B. Harrington has been in Presno long enough for must people here to have become thoroughly familiar with the fact that his work far surpasses that of any other carriage painter of which this section can hoast.

But if there he any who are not yet posted oh this point they are invited to observe John C. Noure's beautiful new delivery wagon which, with three horses abreast, will be on the streats in a few days, also the Kutner-Goldstein Company wagon. These wagons are of Fresuo make, having been built by Louls Hansen and painted by the artist painter, J. B. Harrington. The critic might also notice the excellent work on the other vehicles mentioned—Wells-Fargo's and the Sileby engine. Everybody knows that Mr. Harrington is an artist, with the bows a well as with the brush. It is, no donobe, the artistic genins which he posessees that gives to his work a charm that others attempt in win to imitate.

Fresno is to be congratulated on havings a carriago much in improving and beautifying the appearance to the first.

The Boys of '61 Are Not Forgotten.

WOMEN PAY THEIR TRIBUTES

Scenes in the Hall of Atlanta Post and at the Cem-

To those who were born away back in the thirties, forties and fifties, time seems to have been going at a gallop of recent years. It is not easy to recall the fact that Gettysburg denotes an event that is nearly thirty-three years old; that Chicamanya is almost forgotten, eave in the records of the pension hureau and school histories, and that Appomattox court house is following John Brown's fort in the march to oblivion.

The comrades of Atlanta Post, G. A. R.; the ladies of Custer Circle, G.A.R.; and the Women's Relief Corps are, however, not content to see the deeds of the dead in Mountain View cometery so swiftly forgotten. At all events there were many loyal hearts yesterday that found solace in showing that the self sac-rifice of the boys in blus was not all in

vain.

It was an ideal day; a sky fleeked with clouds just enough to be agreeable, and a nice breeze to temper the heat, last year Decoration Day was rather too warm to be agreeable; this year it was not so. Many of the public officials who were released by the magle word "legal holiday" from their desks and offices paid the proper tribute to the boys who died that the Union might live.

At the master of Atlants Post in Edg-erly hall in the morning many old fam-ilian names were not present to answer. Nohle was not there, Adlams was not there. Other comrades were kept away by sickness or infimilies, for it is dis-coverable without superfluous arithme-tic that the youngest man entitled today to make in the G.A.R. must be 51 years old, while the older members are away up in the seventice and eighties. The boy of 18 at Antictam is a man of 52 to-day. So fast has modern history trav-eled.

up in the seventies and eighties. The boy of 18 at Antiestan is a man of 52 to-day. So fast has modern history traveled.

When the veterans assembled in Edgardy half for the ritualistic services yesterially morning they were gratified by the eight of a wooden column, to the memory of the dead of Atlanta Post, prettily decorated by the Women's Relief Corps. There had been something of a rivalry between the Relief Corps and the ladies of the G.A.R., but as they were laboring in a common cause the end could not but be satisfactory. The committee of the Women's Relief Corps who decorated the column in the half were Mrs. Annie Ropers, Mrs. Statlant and Mrs. McDonald. In addition to this Mrs. Laura Torley, Mrs. Beata and Miss Beeson were a committee to the decreations at the ceme-

The ladies of Custer Circle, No. 18, G. A. R., took charge of the services at the graves, according to the stricts at the graves, according to the ritual of their order. Mrs. Easterbrook presided, with Mrs. Richtardon as chaplain, and Mrs. Baron as secretary. About twenty ladies of the circle were in attendance. The veterate of the C. A.R., who were not engaged in decorating the graves not side of the main plot doffed their hats and listened reverently to the graves outside of the main plot doffed their hats and listened reverently to the services performed by the ladies. A number of speciators were present and there were probable not less than 200 persons within the sound of the graves; and there were probable not less than 200 persons within the sound of the graves will at its averlose were in magrage. The column "to the unknown dead," had been decorated by the ladies of the G.A. R. on the previous day.

In hygone years it has been the custom for the comrades of Atlanta Post to hold the entire services at the grave side. But age and infimities and death have fearfully diminished the numbers of those who can answer there," if a roll call should be had at the veterane plot in Mountain View cemstery. His assertion in your issue last Friday that the elaughter of innocente and destruction of property by cyclone in St. Louis was an expression of God's especial wrath against the money power which oppressed the poor, has already made some of us simple tinners bow-legged from apprehension that the hand of chastisement will be laid on our heads next.

A Dutchman back in New York heard a dug howling at the moon and sald to his wife, "Katrina, somedings ba-a-a-i vas goin" an happen!" The dug howled again and Dutchy began to walk the floor and wall, "Some terribles vas goin" zu happen." The dog howled some more and Dutchy went outside and joined him, sod their united howling soon raised a revole in the neighborhood, and, notwithstanding Dutchy's protests that some grave caiantily was impending, he was persuaded that matters had elimented down to the eimple proposition that he either had to stop howling and go to bed or get his inequal broke—so he went to bed.

In that town there existed a good, newsy morning paper—just like the Risgustuax—and at day break the next morning Dutchy was waiting for the carrier to get the first news of their dough the headines swhile and thun set in to wake the neighborhood from its blissful morning snooze, howling as only a guite the head income with the leadines while and thun set in to wake the neighborhood from its blissful morning snooze, howling as only a guite feed on its at an end."

Democrats Will Straddle at

SMILE LIKE CHRISTIAN MARTYRS

Sau Francisco is Too Lazy and Indifferent to Warraut Great Enterprises.

SAN FIGURESCO, May 29.—There is one thing which lends to politics here a national interest at the moment—questions of policy, not candidates, engage the minds of the politicians. Democrals talk of silver and gold and the minds of condemning the religious propriety of condemning the religious suc, rather than about who shall be

siste convention—whether there will be about of the side that sails to have its way in the matter of the financial plank of the platform.

"No," he said. "I see no signe of such a disposition. I believe that the convention will for the most part he competed of men whose first desire is to hold the party together for future user-timess, and are ready to make concessions to that end. There is no telling just yet whether the advocates of gold or the advocates of silver will have the unajority, but it will not be a large one either way, and that fact will induce temperate action. Of San Francisco's 16i delegates most will be for gold, but on the other hund there will be some of the most pronounced silver men in the state—James V. Colleman, for instance, and Sam Braunhart, P. J. Harney, Jasper McDonid and M. C. Ilasesti. All the talk of packing the delegation is gammon. The aim has been to pick representative Democrata, and they have not been questioned as to their financial views.

cammon. The aim has been to pick representative Democrata, and they have not been questioned as to their financial views.

Mr. McNab went into an analysis of the 116 delegates aiready elected in the interior, to maintain his point that the Democracy if divided on the money question is yet solicitous to secure harmony. The convention will have 61 delegates, according to McNab, stand as follows: San Bernardino, 8 delegates, uninstructed, majority of silver; Stanislaus, 8, uninstructed, majority either for gold or a compromise; San Luis Oblepo, 6, uninstructed, about evenly divided; Shasta, 6, uninstructed, about evenly divided; with some disposed to be neutral; Trinity, 3, uninstructed, about evenly divided; Mr. Trinity, 3, uninstructed, all for silver; San Diego, 10, uninstructed, eight pronuces for gold and one silver; San Diego, 10, uninstructed, eight pronuces for gold and two indifferent; Colusa, 7, uninstructed, but they have adopted the unit rule and the gold mon are in the majority; Humboldt, 8, uninstructed, all for silver; Genn, 4, uninstructed, all for silver; Genn, 5, uninstructed, all for silver; Genn, 6, uninstructed, conditions of the condition of the co

vention, though he is a champion of silyer.

It is obvious that if Mr. McNab figures correctly he is quite right in thinking there will be no bolt from the Domcratic convention on account of the
money issue, and that California will
send to Chicago a delegation whose
voice will be for a straddle and harmony.
Nevertheless there will be hot work at
Sacramento, for many of the silver man
feel that their cause is too vital to be
side-tracked for the reasons of policy
which appeal with most force to the
practical politician. These radicals will
raise a row.

than she needs to take care of her house and babies and, being human, she has her cares and worries, and tinds her life small because the is. So she gets it into her head that, in some vague way, sho's wronged—that she'd have been somebody somebow if it wasn't for she doesn't know what. That's the harm these platform women are doing. You don't hear them talking of girle' duty to their parents and wives' duty to their hushands, but all about rights, rights—as if valing would make a smark women out of a wives' duty to those missians, one about rights, rights, rights—as if voting would make a smart, women out of a stunid one in a magical way, any more than it makes a wise man out of a foot. These suffragists are unsettling little women's little minds and making them unhappy. They're spreading self-consciousness, inliaming vanity and substituting all sorts of fogry and impossible longings for what should be every sensible woman's honest ambition—which is to get some decont follow to fall in love with her and marry her. That's what my wife says, and I'm with her. Becides, opposition to woman suffrage means that we corral the sulcon vote for the Democracy."

crais talk of silver and gold and the propriety of condemning the religious issue, rather than about who shall be numinated for mayor and sheriff, and who shall have the distribution of the city hall natronage. All that will come later, of course, but just now the arguing is for principles. There is more interest in finance than anything else, and most of the earncetness is apparently on the side of the silver men. The gold man have the calmaces of that consciousness of angerior wisdom which seems to be one of the resultant blendings of belled in the single standard. And that helps to inceme the 16-to-1 curvalers. Yesterday I seked Gavin McNab, the chief of the Julia, what he thought was likely to happen at the state convention—whether there will be abolt of the side that fails to have its way in the matter of the financial plack of the platform.

"No," he said. "I see no signs of such a disposition. I believe that the composed of men whose fixt desire is to bold the party together for future usefulness and are need to make a consent.

for many blocks around were emptited of their tenants, and no new once have appeared to take their places. In consequence, rents all about these hig new building bave gone down and the value of property depreciated greatly. Similarly, clove keepers throughtout hearthy will suffer from the Eumorium. You hear the argument gravely made by apparently intelligent men that these large structuren and vast business establishments are evils, precisely as workingmon cannot see the benelicance of the outstitution of machines for hand labor. So they are an avil in a town at once so lethrage and self-estaffied as San Francisco, which has a peculiar talent for remaining stationary, and whose business men lave neither the mind nor the energy to be self-legill and enterprising. If the city were growing, every new Mills building, every new Mills building, every experiment like the coloseal Emporium, would be a stimulating improvement intend of a sapping calamity. When a building becomes empty here it is apt to take empty, and when a neighborhood loses by a movement of population in another direction it falls into decay and gets to be as dead and quiet as a cemetery. We are showing our public spirit just now, not by trying to extend trade or by giving our minds to the developement of hunterior, but by getting up a carnival, which promises to be a cross between a Southern Californian flower show and an old-fashioned Fourth of July. The carnival is well enough, no doubt, Whatever contributes fun to life and brings in nickels from the country to the broad-minded and free-handed metropoid edeerevs a San Franciscan's approval. But the carnival proparations irresistably recall the Half-Million Club, What has become of that aggregation of them a Shortridge in eloquence, who were to give us half a million inlusbitants in no time? I don't know—anne frimmering with the noble boulevand to San Jose on which the Call, afflicted with home-aickness and notions of doing things wholly unmetropolitan, had series rural heart. The men who put up Mi

deserve—the backing of a vigorous, business-like and homo-genious community.

But if San Francisco ien't communed and therefore not litted to render happy the modern, money-making American, it is a good place, a comfortable place, for the unnercantilo—the best in the United States. For it is lazy and quiet and unharrassing, and the absence of public spirit brends a blessed disposition in the individual to mind bis own business and accord that high privilege of a serenecivilization to others I don't think the Orbitism Endeavorers, if they hold their next annual international conference here, as proposed, will like the spirit of San Francisco, which is sinually good-humored and cheerfully indifferent.

is a consistent of the decimal of the monony issue, and that California will send to Chicago a delegation whose wide with the for a straddle and harmony. Navertheless there will be hot work at Sacramento, for many of the silver monifect that their cause is too vital to be dide-tracked for the reasons of policy which appeal with most force to the practical politician. These radicals will raise a row.

The voice of the harmonizer is also heard deprecating any severe pronouncement on the religious issue; he desires to avoid direct mention of the American Protective Association, to the end that ardent sutsgonisms be not provoked. But the harmonizer won't base lists way in this. "It shall introluce the resolution myself, if necessary," said McNab. "The Republicans base and policy with the supplicans have alophed the A. P. A., and I believe in giving them the full benefit of their course. The American Protective Association will be mentioned by name in the Democratic platform, and condenneed as stroogly as decorous English will permit."

And Miss Authony may as well spare herself its prouble of young to Sacra-herself its prouble of young to Sacra-herself with the full benefit of their course. The American Protective Association will be mentioned by name in the Democratic platform, and condenneed as stroogly as decorous English will permit."

And Miss Authony may as well spare herself its prouble of young to Sacra-herself. the chances of a bolt at the Chicago convention, and on the whole expect that either the silver men or the gold men will walk out. In that case, the possibility of a fusion with the Populists on a free silver candidate is talked of. Republicans take pleasure in pointing out how strong Cieveland is with the sound-money wing of his parly in the East, and predict a fourth run for a third term, whereat the baited Democrat smiles with a sad patience that would fit him to pose to an artist as model for an early Christian martyr. THE VALLEY ROAD DIRECTORS

Looking Over the Fleid-Delayed by Condemnation Suits.

The directors of the Valley road have accepted the invitation of the France Committee of Ten and will send a com-mittee here next Fridny to hold a conference with property owners along the routes by way of Hanford and by way of Yisalia and will endeavor to come to an understanding concerning rights of

an understanding concerning rights of way. The committee will remain in Freeno Saturday and perhaps Sunday. If it were not for the four condemnation suits now pending in this country, grading would commince on Q street within the next ten days. The company is anxious to begin hera, and has expressed a desire to give to Freeno parties the contract of grading from the San Joaquin river to a point three miles seath of Freeno. If this contract in Len to Freeno bildders the work will go to Freeno men and Freeno teams. But the company cannot begin until the condemnation suits are settled. These are in the courts now and there is a desire among all parties to push them as fast as possible, but in spite of everything there is delay in law, and this delay just now is to be regretted, for it no doubt stands in the way of beginning work at this point.

WEDDING AT FOWLER.

Marriage of Wythe M. Giffen and Mice May Stonicker.
Entron Republican:—The wedding

the Presbyterian church in the Presbyterian church on Thursday evoning was the largest gathering at any marriage in Fowler for some time. The church was decorated with flowers, date palm and accacias. The organ was a mass of green and flowers. The "boll" was held in suspension just in the act of sounding the lost tone. Mendelssohr's wedding the lost tone. Mendelssohr's wedding march played by Miss Dainger field interningida with the fragrance from the flowers, added much to the program of the evening. At 8.30 p.m. Wylio M. Gilfen and Miss May Slonicker walked biltily through the siles to the front of the church, stopping underneath the flowery bell. Rev. Giffen pronounced them man and wife. The company present proceeded to congratulate the newly married couple and by .30 all had dispersed, wishing Mr. and Mrs. Wylie M. Giffen a prosperous and happy journey through life.

Miss Slonicker has been a toacher in our public school at Fowler for two years. Mr. Giffen has been intrusted with the management of J. C. Kimble's large interests in this county for three years. Mr. Giffen la a strong factor in the V.P.S.C. having served as president in the county union.

RESCUE AND SLUM WORK. Thursday evening was the largest

work of the Salvation Army will be held at our hall tonight, May 31. The meeting inside will be preceded by a big street demonstration representing different characters as a result of our work to these particular branches.

The object of this meeting particularly is to raise funds to aid in carrying on the work to our resure bome at Esculah, Cal., where they are in great need of financial help. We as a cerep propose to do all we individually can, and we also earnestly appeal, through the kindness of the Kerusucax, to the people of Freeno, believing that all who read this appeal will do their ut noet in helping this grand and glorious branch of our work slong, when made acquainted with like facts of our need.

For those who come to our meeting a alver collection will be taken at the door, where all will have an opportunity of giving. Those who cannot come and wish to help us will please send their contribution to Captain C, M, Kingman, 133 K street, or drop a line to that address and we will call for it. Believing, dear reader, that the outeast and downtrodden will receive your practical sympathy, we are faithfully yours for the salvation and help of ail classes, C M, Kingman, Oapt.

Lambert's Application for Bail.

John W. Lambert, by his attorneys,
Mark Walson and W. D. Crichton, isst evening filed an application in the su evening fled an application in the su-perior court that he be admitted to bail. The ground of the request is that the circumstances of the shooting of Alex-ander Batbeder by the prisoner proved that it was not premediated murder, and the defendant is therefore entitled to bail. The proceedings will probably come up on Monday.

Field the libe of which soldom or never was observed before. In nove 26 volumes of a well known spectramon's newspaper a similar incident has not been recorded. The Field says that "ascarling, flying swiftly from its nest, collided with a passing rook, and the starting's beak penetrated the head of the rook, causing instant death." Hawks, of course, often strike their game in midair and kill it, but in that case the collision is intentional. During the migrating periods birds are often falled and mained by dwing nguingt mescen obscales at night,

birds are often inicia and manned by dying against baseen obstacles at night, as telegraph wires or high waterfulls. Many ducks and geese fly up stream in-to the Niagara falls every year, but the like of this buckent is not recorded.

lay just now is to be regretted, for it as doubt stands in the way of beginning work at this point.

Three of these suits affect land on Q street, where the first work will begin and the fourth is a mile north of town. There is one condemnation suit in Madera county and two in Merced. These also are causing delay, especially those in Merced, for the company has laid off men to wait for a decision in the cases. So far as these condemnation suits bave already been decided, the decisions have in every instance set a lower value on the land than the company had previously offered. But, for all this, the company is no less anxious than are the people of Fresno to see the condemnation suit slipposed of, by compromise, or otherwise, so that work may proceed.

The construction of the road is being pushed. Work on the bridge across the San Joaquin is progressing, notwillistanding the fact that the river is very deep. The deput, coundhouses and awitches lave been staked off on Q street. The road has reached Merced, and is headed this way.
